FULL-ARCH REHABILITATION

A fixed arch in 24 to 48h

Replace all the teeth of an entire jaw with only 4 to 6 strategic implants that screw a complete, fixed, immediate bridge. You come in with broken or missing teeth, you leave with a fixed smile.

Cas clinique · Tanger Bay Dental Center

4-6	24-48h	0
IMPLANTS	FIXED BRIDGE PLACED	REMOVABLE DENTURE

THE PRINCIPLE

A full jaw on 4 to 6 pillars

A few implants placed in the right spots are enough to screw a **complete, fixed bridge**. Immediate loading: no denture that moves, no adhesive, no year-long wait for a bone graft.

Immediate loading

A fixed temporary bridge is screwed in within 24 to 48h. You leave the clinic with solid teeth, not a gap.

No more slipping dentures

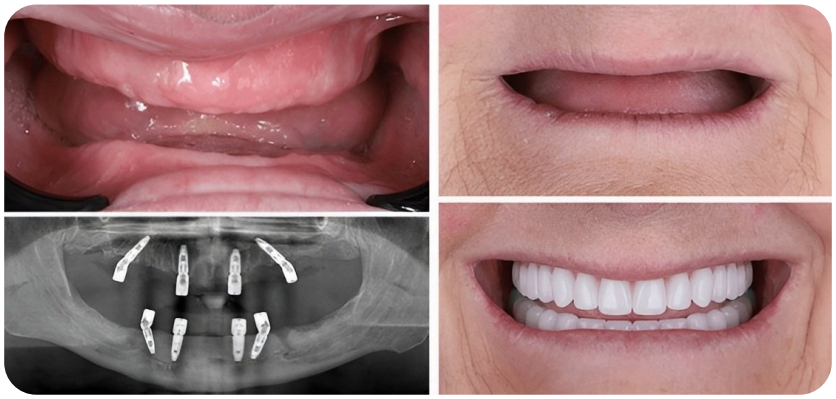
No unstable denture, no adhesive, no discomfort. The bridge is screwed firmly onto your implants.

No year-long wait

Complex bone-graft delays are avoided. Treatment moves in days, not months.

THE TRANSFORMATION

From failing teeth to a fixed smile



Cas clinique All-on-X – Tanger Bay Dental Center

WHAT IT REALLY CHANGES

Immediate return of facial aesthetics, **lip support**, confidence to speak – and an end to chronic dental infections and pain.

YOUR JOURNEY

Your appointments, step by step

1

Diagnosis, 3D scan & virtual design

45–60 min

- Full assessment and 3D X-rays
- Digital smile design

2

Surgery day: extractions, implants & impression

2–3h

- Extractions and placement of 4 to 6 implants
- Digital impression for the lab

3

Fixed temporary bridge screwed (24–48h)

45–60 min

- Screwing the fixed temporary bridge
- You leave with fixed teeth

4

2-week check & suture removal

15–20 min

- Healing check
- Soft-food diet guidance

5

Osseointegration & final impression (4–5 months)

45 min

- Checking bone integration
- High-precision impression for the final bridge

6

Aesthetic & phonetic try-in

30–45 min

- Validating aesthetics
- Testing speech

7

Final smile delivery

30–45 min

- Placing the final bridge (titanium / zirconia / porcelain)
- Your lifetime smile
